COLLEGE OF LIBERAL ARTS & SCIENCES, UNIVERSITY OF FLORIDA

Dr. Louis J. Guillette is a Distinguished Professor of Zoology at UF and an international expert in reproductive biology. The Group Advantaged Training of Research (G.A.T.O.R.) will create a new model for mentoring and research, helping faculty engage students of all ages—from high school through graduate school—in hands-on scientific research.

Dr. Randolph S. Duran is a Professor of Chemistry at UF. Science for Life will establish the largest early undergraduate research program in the State of Florida. The award will also equip a new HHMI Core Lab in the heart of UF's medical complex and will fund teaching postdocs in collaboration with Morehouse College and Scripps Florida.

*The University of Florida Alumni Association and
The College of Liberal Arts and Sciences
cordially invite you to a reception
honoring Howard Hughes Medical Institute award winners*

**DR. LOUIS J. GUILLETTE
HHMI PROFESSOR
&
