Research Opportunities During Graduate Studies

The Future Academics and Researcher (FAR) program allows students enrolled for the Master of Arts degree in Speech-Language Pathology or AuD degree to seek unique research training and experiences while completing their degrees at the University of Florida.

What is FAR?

- A unique program that provides opportunities to get involved in ongoing research.
- Up-close experiences working in research laboratories in CSD.
- A great program for learning more about research careers in CSD.
- A chance to experience the thrill and challenge of doing cutting-edge science with expert researchers!

What does FAR provide?

- Research mentoring by seasoned faculty scientists.
- Opportunities to work in one or more research laboratories.
- Opportunities to attend research colloquia series and journal clubs.
- Structured interaction with other doctoral students and research faculty.
- Interdisciplinary interactions and laboratory visits.
- Optional Masters thesis for speech pathology students.

How can I enroll in FAR?

- Find out more about FAR at: www.csd.ufl.edu/goFAR
- Review faculty research profiles at: www.csd.ufl.edu/fac.html.
- Mention your interest in FAR when applying to the MA/AuD program at UF.
- Once accepted in the FAR program, you will be formally paired with a faculty mentor.
