

your eyes aren't reading this...

YOUR BRAIN IS!

UF | UNIVERSITY of
FLORIDA

Enroll Now: SPA 2109 Language Breakdown and the Brain
Tuesdays 10th period; Thursdays 10-11th period 3 Bio Science credits

It is obvious that
language is created by the brain.

It is **NOT** obvious
how the brain does it!

Did you ever wonder...

- how the brain learns language • how words are stored in the brain • what brain imaging tells us about language
- why different types of strokes lead to different types of impairments • how therapy “mends” a damaged brain • why some children have difficulty learning language • what we learn about language from genetic disorders in children •

SPA 2109 Language Breakdown and the Brain, Professor L. Altmann
Tuesdays 10th period; Thursdays 10-11th period; 3 Bio Science credits
